

Jesus A. Gomez- Professional Statement

I am a senior at The University of Texas at Arlington pursuing a Bachelor of Science in Information Systems, with a strong foundation in data analysis, database management, systems design, and cybersecurity. My academic background, paired with hands-on experience through internships, has allowed me to apply classroom knowledge to real-world scenarios. As a cybersecurity intern, I conducted risk and threat management assessments and developed awareness content to strengthen organizational security. In my website development internship, I optimized functionality and supported both front-end and back-end updates with a focus on accessibility and cybersecurity best practices.

Alongside my academic and internship experiences, I have worked as a Bilingual/Benefit Center Advocate, where I leveraged my analytical skills and bilingual communication abilities to resolve client issues and improve operational efficiency. These roles have sharpened my technical expertise in SQL, Python, Power BI, and Tableau, as well as my ability to collaborate effectively across diverse teams.

I am passionate about leveraging technology to solve problems, safeguard information, and enhance efficiency. My goal is to continue developing as an information systems professional, with a focus on data analysis and cybersecurity, where I can contribute to impactful solutions and drive continuous improvement.
